Installation Instructions:

Wiring methods shall be in accordance with the National Electrical Code/NFPA 70/ANSI, and with all local codes and authorities having jurisdiction. All units should be installed by a trained service personnel.

Installation (NetWaySP1BT):

1. Mount NetWaySP1BT in desired location utilizing the mounting hole *(Fig. 3a, pg. 6)*. Use a proper fastener and/or wall anchor when securing NetWaySP1BT with screw through its mounting hole to the surface.
   Note: Earth ground can be used, if needed, for high transient or outdoor environments.
   If used, insert an Earth ground wire (included with product) into the internal ground terminal until secured (a slight tug can check stability) & fasten the free end to a chassis earth ground.
   If earth ground is not attached and needed, refer to Fig. 1, pg. 4 for manual placement.

Installation (NetWaySP1BTWPN, NetWaySP1BTWP, NetWaySP1BTWPX):

2. Remove backplane from enclosure prior to drilling. Do not discard hardware.
   Note: Make sure that hardware will not interfere with components of the circuit board.
3. Mark and drill desired inlets on the enclosure to facilitate wiring. Maximum NEMA type 4X rated fittings to be used are 0.5". Follow manufacturer's specifications for the appropriate size opening.
   Note: Inlets for conduit fittings should only be made on the bottom of the enclosure.
   To facilitate wire entry utilize weather-tight NEMA rated connectors *(supplied)*, bushings, and cable.
4. Clean out the inside of enclosure before remounting circuit boards/backplane.
5. Mounting NEMA4/4X rated enclosure *(Enclosure Dimensions, pg. 10-12)*:
   Wall mount: Mount unit in desired location. Mark and drill holes to line up with the top and bottom hole of the enclosure flange. Secure enclosure with appropriate fasteners (e. g. screws and anchors; bolts and locking nuts, etc.) that are compatible with mounting surface and are of sufficient length/construction to ensure a secure mount *(Fig. 7, pg. 9)*.
   Pole Mount: *Refer to Fig. 8 - 12, pg. 9.*
6. Mount backplane in enclosure with hardware.

Power Connection (NetWaySP1BT and NetWaySP1BTWPN):

1. Use external 48-55V UL Listed ITE power supply, carefully observing correct polarity *(Fig. 1, pg. 4)*.
2. Use 14AWG or larger for all power connections.

Power Connection (NetWaySP1BTWP and NetWaySP1BTWPX):

Before powering unit, set input voltage selection switch to proper Input Voltage position (Fig 5a, 6a, pg. 7, 8). Units are factory set for 115VAC.

1. Connect AC power from overcurrent protective device circuit breaker
   (20A @ 115VAC, 60Hz or 16A @ 230VAC, 50/60Hz) to the terminals marked [L, N] on power supply board *(Fig. 5, 6, pg. 7, 8)*. Connect ground lug to earth or green branch wire on backplane (12AWG min.).
   Use 14AWG or larger for all power connections (Battery, DC output, AC input).
2. **Battery Backup** (if desired): Connect four (4) 12VDC batteries wired in series to terminals marked
   [– BAT +] *(Fig. 5, 6, pg. 7, 8)*, carefully observing polarity.
   When use of stand-by batteries is desired, they must be lead acid or gel type.
   For outdoor battery backup, battery enclosure must have sufficient ventilation. Use Altronix Vent2 kit.
   Note: When batteries are not used, a loss of AC will result in the loss of output voltage.
   Keep power-limited wiring separate from non power-limited wiring by utilizing separate knockouts/ inlets. Minimum 0.25" spacing must be provided.

   Please ensure that the cover is secured with latches and optional Altronix Lock1WP for
   NetWaySP1BTWP/NetWaySP1BTWPX/NetWaySP1BTWPN.

Input/Data Connections:

1. Connect structured cable from port marked [Data Port] on NetWaySP1BT to a PoE midspan/endspan *(Fig. 1, pg. 4)*.
2. Connect fiber optic cable to a fiber SFP module. Connect the module to the port marked [SFP] on the NetWaySP1BT. Connect the other end of fiber cable to an SFP module of a remote device.
   SFP LED will illuminate indicating data connection *(Fig. 1, pg. 4)*.
3. Using 4-pair CAT5e or higher cable connect PoE load device to be powered to the port marked [802.3bt Output] on NetWaySP1BT. After authentication and classification have been established, [PoE Signal] LED will illuminate indicating PoE presence.
